SAL HEPATICA HELPS CHECK A COLD FASTER BECAUSE ITS DOUBLE ACTION

1. Cleanses the System 2. Combats Acidity

THIS day before Christmas, check your system's thermostat for a cold. This thermostat, tucked just behind your nose and mouth, is the one that tells you when you're sick. It's the one that tells you when you're sick. It's the one that tells you when you're sick. It's the one that tells you when you're sick.

You can often check a cold right at the beginning by taking two fundamental steps whenever it first threatens.

1. Remove mucus from the intestinal tract.
2. Combat the acid in that frequently accompanies a cold.

And you can do both things, at once by taking Sal Hepatica! Sal Hepatica is a pleasant, effective natural salt laxative that

not only removes mucus quickly and profitably, but it also helps to get rid of mucus before it even starts to form.

Sal Hepatica has other uses, too. It helps you to get rid of mucus, whether it's in the nose or in the throat. It helps you to get rid of mucus, whether it's in the nose or in the throat. It helps you to get rid of mucus, whether it's in the nose or in the throat. It helps you to get rid of mucus, whether it's in the nose or in the throat.

Get a bottle of Sal Hepatica from your favorite drug store. It's the most perfect in every condition. They are the most perfect in every condition. They are the most perfect in every condition. They are the most perfect in every condition.

"Well, you'd better understand that the 10 years only is a claim to the son, not the mare. It has a really lovely little colt in it, it is in good shape."

"Oh, I like that horse too much on the old farm," Anne said, smiling with her eyes closed.

Ford Motor Company, of THE NEW MERCURY 8

For the new Mercury 8 has been built to provide Ford standards of quality and performance in a larger car, at slightly higher price. It is a new name—a new car—and above all, a new value.

Stiffened construction and a web, money body give the new Mercury something of the character of the Lincoln/Duplex. Rich interior appointments reflect its outward beauty. Advanced

engineering makes it unusually quiet and comfortable. It has a new 55-horsepower V-type 8-cylinder engine and hydraulic brakes.

The extra value and modern design which distinguish the Mercury are equally evident in the new appearance and new features of the two 1939 Ford cars.

Two New Ford Cars . . . Both the Ford V-8 and the De Luxe Ford V-8 have graceful, sweeping lines, though they differ

in design. Both are generously proportioned, inside and out. Both have new hydraulic brakes, built to strict Ford standards. And both . . . by reason of scientific soundproofing and new steel construction . . . enable you to enjoy a really quiet ride.

And under the long, sleek hood of the 1939 Ford V-8 and De Luxe Ford V-8 alike, an economical 55-horsepower V-8 engine delivers covered power with surprising smoothness.

Two Ford Quality Values . . . Behind these two new Ford cars, and the entirely new Mercury, the Ford Motor Company of Canada, Limited, also presents the Bluebird Lincoln/Duplex and Lincoln/Duplex quality cars—each presenting the remarkable value and performance for which the Ford name stands.

With this broad range of cars and prices, our dealers are better prepared than ever before to serve your individual needs.

A NEW BATTERY

THAT LASTS 68% LONGER!

● It's called the Willard "H-R"—and was developed by the country's leading battery engineers after a 9 year study of how batteries perform under all kinds of driving conditions. The "H-R" will do all the things you'd expect a good battery to do—and the life histories of 75,000 batteries, driven

over one billion miles, prove that it will last 68% longer than the average of competing brands!

In your car, this new "H-R" means more dependable power—more safety for you and your family and quicker starts for your car for more months and more miles.

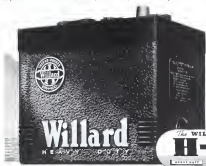

Here's why

THE "H-R" LASTS 68% LONGER!

The amazing performance is due to new developments exclusive with Willard. Most important single feature is the new Willard Thermal Factor Insulation. Invented because the Willard plates of the H-R, those thin sections not only increase the battery's life—but protect you against the sudden freeze-in hours caused by "thaw-er" or backfired flames.

Explosion? No—because of its extra walls and strength of life zone. H-R runs in its own "You'll be safe, and you'll save money, if you replace your present battery with a Willard H-R—NOW!"

Governments Were Amazed

THE challenge was simple: to test the battery in the laboratory and prove that it was not yet known how the life of the battery can be prolonged. They say that the battery is not yet known how the life of the battery can be prolonged.

However, it is not yet known how the life of the battery can be prolonged. They say that the battery is not yet known how the life of the battery can be prolonged. They say that the battery is not yet known how the life of the battery can be prolonged.
